expertpower™

Energy Management System (EMS)
Comprehensive Power Quality Analysis
Customer Billing and Invoicing

expertpower™ at a Glance

ExpertPower™ software solution provides comprehensive energy management and micro SCADA capabilities for a wide variety of purposes such as: sub-metering, billing, meter data management, energy efficiency, demand response, power quality analysis, independent power producer core processes and generator control. ExpertPower™ is available either as an on-line cloud service (Service Edition) or as a stand-alone on premise package (Pro Edition).

SATEC's complete versatile solution includes our wide range of analyzers combined with ExpertPower™ software, offering information and analytics to improve the efficiency, reliability, security and profitability of our customers' energy system.

ExpertPower™ uses a standard web browser as user interface, for both local installations and Internet remote installations. This reduces the total cost of ownership (TCO) by eliminating the need for training and special client hardware and software. With ExpertPower™ Service, there is no need for server hardware and software or on-site IT experts.

With installations of over 40,000 managed devices at one site, ExpertPower™ is the most powerful energy management solution on the market. Its scalability allows you to start with small installations and to expand as your business grows.

Main Features

Data Collection

- Automatic data collection from energy meters (electricity, water, gas etc.), power quality analyzers and substation automation controllers
- Complex calculations from two or more devices
- Easy configuration of new devices, communication server and register mapping

Presentation

- View all data in your browser—no software installation, no employee training
- Customized dashboards, single line diagrams with real time data, graphs with status indications (color, icon)
- Multi-user, multi-security levels
- GeoLocation—positions your metering points on the map, providing geographic navigation and grouped alert monitoring
- Lobby Application—customizable full screen kiosk mode showing consumption over time, energy saving competition, weather forecast and more

Historical information

- All data is logged in the database
- Chart any measured parameters
- Monitors trends to identify potential problems

Reports

- Manual, automatic or scheduled reports
- Preconfigured or customized reports
- HTML, export to MS Excel and PDF formats

Alarms and Events

- Multi-level thresholds for complex criteria
- Messaging, emails and SMS alarms
- Logs all alarms
- Requests user acknowledgement

Connectivity & Interoperability

- Integrate all energy management, automation system and billing into one web based system
- Built-in data export to different formats (Excel, PDF , CSV etc.)
- Standard RESTful Web service API and IEC 60870-5-104 interfaces allow for easy integration with third party enterprise applications such as BMS, SCADA, ERP, CRM and Accounting

Architecture

- Complete web based design with multi-browser support
- Grow as you go architecture—from single device to tens of thousands
- Distributed servers—support for server virtualization technologies such as VMWare
- Local or remote MS-SQL database
- Supports express, standard and enterprise MS SQL editions

Energy Management & Power Monitoring

Allows you to monitor your power and energy consumption in complex sites.

- Collects data from SATEC and other products over Modbus, BacNet, DLMS and SNMP protocols
- Graphic or geographic maps, icons and color status indicators
- Virtual devices—real time calculations such as summation, subtraction and more
- Historical data, trends and detection for identifying unnecessary load operation
- Advanced comparison wizard—select multiple devices, parameters and time periods

SINGLE LINE DIAGRAM

With real time date updates

EXECUTIVE DASHBOARD

Fully user-editable customized dashboards for each user

ENERGY INTELLIGENCE: LIVE DATA

COMPARISON

Billing & Subtenants

Enables monitoring the consumption of sub-tenants and managing the billing process.

- Dynamic tariff settings including prices, usage and seasons
- Accurate cost calculation
- Complete submetering solution
- Tenant management
- Flexible invoicing options
- Invoice comparison

Demand Response & Smart Grid

- Automatic and manual operation of generators to reduce peak demand according to schedule, incentives and availability
- Power station load management, production tracking and consumption monitoring, allowing detection of consumption irregularities and anomalies
- Control of substation automation bay controllers

GEOLOCATION

ExpertPower™ GeoLocation Dashboard allows for geographical meter display, alert notification and navigation on a map or satellite view.

IPP Power Plant Management

- Generates daily production plans based on different algorithms, send/get daily production data from a CDC (Central Dispatch Center)
- Predicts customer consumption
- Manages power plant statuses such as: availability, startup duration and interruptions
- Issues gas orders
- Generates energy and cost balance calculations based on import & export energy, operational parameters, plant statuses and different tariffs
- Complete billing solution for electric power and related thermal products, including invoicing and a large set of configurable reports and tariffs

Tenant Mobile Application

- Supported on both iPhones and Androids
- Monitor monthly/daily/hourly cost
- Notifications about excessive usage and a high predicted monthly bill
- Look around to compare my normalized consumption with other tenants
- View past invoices

System Configuration

Applications & Case Studies

Commercial

Commercial Buildings | Shopping Centers

Universities | Hospitals | Hotels

Chain Stores | Residential Buildings

ENERGY EFFICIENCY & COSTS

- ❑ Reduce energy consumption
- ❑ Reduce surcharges and penalties (power factor, peak demand, etc.)
- ❑ Initiate corporate level saving plans
- ❑ Increase green star rating

SUBMETERING & BILLING

- ❑ Comprehensive billing solution for energy retailing (electrical, water, gas and air condition) to sub-tenants
- ❑ Web access for tenants, to view their bills and on-line data

POWER RELIABILITY

- ❑ Proactive maintenance for maximum system availability
- ❑ Analyze demands to help utilize existing infrastructure and prevent overdesign

Utilities | Smart Grid | Renewable

Generation | Power Plants

Transmission | Distribution | Smart Grid

Renewable: Solar | Wind | Waste Water

SMART GRID

- AMR/AMI complete solution including billing
- Comprehensive substation automation
- Monitor and reduce energy losses

POWER QUALITY

- Analyze source of power quality issues to allow isolation

- Manage customers' power quality

NETWORK SECURITY

- Proactive maintenance for maximum system availability
- Analyze demands to help utilize existing infrastructure and prevent overdesign

Data Centers

ENERGY EFFICIENCY & COSTS

- Reduce energy consumption
- Reduce surcharges and penalties (power factor, peak demand, etc.)
- Initiate corporate level saving plans

SUBMETERING AND BILLING

- Comprehensive, high-resolution billing solution for retailing energy to customers, down to an

- individual electric cabinet or even individual computer
- Web access for customers to view their bills and online data
- Power reliability
- Proactive maintenance for maximum system availability
- Analyze demands to help utilize existing infrastructure and prevent over design

Industrial

Process Industry

Semi-Conductors

Pharmaceutical

Process Industry

Mining

Automotive

ENERGY EFFICIENCY & COSTS

- Reduce energy consumption
- Reduce surcharges and penalties (power factor, peak demand etc.)
- Initiate corporate level saving plans

POWER RELIABILITY

- Proactive maintenance for maximum system availability
- Analyze demands to help utilize existing infrastructure and prevent over-design

POWER QUALITY

- Effectively monitor power quality to prevent failures
- Verify the quality of the supplied voltage
- Generates compliance reports in accordance with international and local regulation
